Hello there. I am measuring with the DAU 34970A on 3 channels (Temp, DC and AC) and reading them VIA GPIB interface in a python script (windows7, visa package, pyvista 1.4 and python 2.7) reading and writing works fine and for the temperature and DC request i am receiving the correct values. however i am having issues getting the correct AC Data (around 150mV when 35mV anticipated).
