FOAM. This acronym has been used for over 70 years at Rensselaer

to designate an

upper-division

course entitled,

Foundations of

course was started

by George

Handelman in 1956,

when he came to

young faculty member, Lee Segel.

About this time a similar course,

Introduction to

Applied

Together Lin and

Segel, with help

In the past, practical applications motivated the development of

theories, which then became the subject of study in pure

mathematics where abstract concepts

are studied for their own sake. The

activity of applied mathematics is thus intimately

connected with research in pure mathematics, which
