Microevolution Gizmo Answers

Observe the effect of predators on a population of parrots with three possible genotypes. The initial percentages and fitness levels of each genotype can be set. Determine how initial fitness levels affect genotype and allele frequencies through several generations. Compare scenarios in which a dominant allele is deleterious, a recessive allele is deleterious, and the heterozygous individual ...

Lesson Info : Explore Learning

Microevolution occurs when there are changes in gene frequency within a population over a short period of time.

Microevolution specifically refers to changes within a population, a population being a group of organisms that breed with each other.
