How modern motoring drives Grumpies to distraction We've said that Christmas is the worst thing; we've said that working for idiots is the worst thing; we've said that holidays are the worst thing. But driving is the worst thing of all. It brings together so many of the multitude of individual elements which combine to make Grumpy Old Men and Grumpy Old Women grumpy. It's got queuing - at petrol stations, on side roads, on A roads, on motorways, at car parks and even at the 'drive through'. Very few things make Grumpies more grumpy than queuing. It's got being ripped off - when you buy a car, when you have it serviced, when you buy anything for it, when anything goes wrong, when you put petrol in it, when you wash it, when you park it, when it

gets towed away and when some asshole you've never met bumps into it. It's got being pissed about - when you want to book it in for a service, and when you get to tax it, insure it and get the MOT for it, and again when you want to sell it. And last but not least, it's got the most essential ingredient of grumpiness. Driving is a triumph of disappointment over expectation. When we were kids we thought driving would be the ultimate freedom and all it has turned out to be is a total pain in the tushkin. And that is not even mentioning Top sodding Gear...

For those who didn't buy the first edition, welcome aboard. For those who did buy the first edition, welcome back, and thanks for making the second edition possible. For those who bought the first edition and are standing in the book store wondering whether to buy the second, what's in it for you? Well, for one thing, it's smaller. (No, no! Don't leave!) I tried to make the first edition a kind of master reference for antiviral protection. That meant I included a lot of stuff that I thought might possibly be helpful, even if I had some doubts about it. This time I've tried to be a little more selective. I've added a little more material to Chapter 4 (Computer Operations and Viral Operations) dealing with the question of computer viruses infecting data files and the new "macro" viruses. I've added two new sections to Chapter 7 (The Virus and Society). One looks at the increasing problem of false alarms while the other looks at the ethics of virus writing and exchange.

Every year, the Hasso Plattner Institute (HPI) invites guests from industry and academia to a collaborative scientific workshop on the topic "Operating the Cloud". Our goal is to provide a forum for the exchange of knowledge and experience between industry and academia. Hence, HPI's Future SOC Lab is the adequate environment to host this event which is also supported by BITKOM. On the occasion of this workshop we called for submissions of research papers and practitioner's reports. "Operating the Cloud" aims to be a platform for productive discussions of innovative ideas, visions, and upcoming technologies in the field of cloud operation and administration. In this workshop proceedings the results of the third HPI cloud symposium "Operating the Cloud" 2015 are published. We thank the authors for exciting presentations and insights into their current work and research. Moreover, we look forward to more interesting submissions for the upcoming symposium in 2016.
