Ainsley Apple is bored with playing in the woods near her orchard home and wants to go on an adventure. Journey with Ainsley and her good friend Peyton Fear as they set off to uncover the truth about the mysterious onions who live over the hill. Are onions really creepy, nasty, and yucky like everyone in Bloom Valley says? Discover what Ainsley and Peyton learn about onions and themselves when they meet Owen Onion.

Contains information on product uses of TV picture tubes and other cathode-ray tubes. Includes an analysis of the basic factors affecting trends in consumption, production and trade of TV picture tubes and other cathode-ray tubes, as well as those bearing on the competitiveness of the industry in domestic and foreign markets. Charts and tables.

One the most beloved TV shows of all time is now a sweet, silly, sci-fi bedtime story perfect for kids and their parents! Best pals Dana (Scully) and Fox (Mulder) have pitched a tent in the backyard for a sleepover. But the night is full of strange sounds, lights, and shadows. Surely there's a rational, scientific explanation for everything . . . or is there? With beautiful illustrations of pint-sized Dana and Fox, this humorous and not-scary-at-all story will introduce the cult TV show to an entire new generation of fans.

This #1 New York Times bestseller is the perfect gift for the young artist in your life! A never-before-published Dr. Seuss non-fiction book about creating and looking at art! Based on an unrhymed manuscript and sketches discovered in 2013, this book is like a visit to a museum—with a horse as your guide! Explore how different artists have seen horses, and maybe even find a new way of looking at them yourself. Discover full-color photographic art reproductions of pieces by Picasso, George Stubbs, Rosa Bonheur, Alexander Calder, Jacob Lawrence, Deborah Butterfield, Franz Marc, Jackson Pollock, and many others—all of which feature a horse! Young readers will find themselves delightfully transported by the engaging equines as they learn about the creative process and how to see art in new ways. Taking inspiration from Dr. Seuss's original sketches, acclaimed illustrator Andrew Joyner has created a look that is both subtly Seussian and wholly his own. His whimsical illustrations are combined throughout with "real-life" art. Cameo appearances by classic Dr. Seuss characters (among them the Cat in the Hat, the Grinch, and Horton the Elephant) make Dr. Seuss's Horse Museum a playful picture book that is totally unique. Ideal for home or classroom use, it encourages critical thinking and makes a great gift for Seuss fans, artists, and horse lovers of all ages. Publisher's Notes discuss the discovery of the manuscript and sketches, Dr. Seuss's interest in understanding modern art, the process of creating the book, and information about each of the artists and art reproductions in the book.

Consumer Product Innovation and Sustainable Design follows the innovation and evolution of consumer products from vacuum cleaners to mobile phones from their original inventions to the present day. It discusses how environmental concerns and legislation have influenced their design and the profound effects these products have had on society and culture. This book also uses the lessons from the successes and failures of examples of these consumer products to draw out practical guidelines for designers, engineers, marketers and managers on how to become more effective at product development, innovation and designing for environmental sustainability.

This is a rhyming book with repetitive text. It is a humorous book about bugs.

GOT TO THE TRUTH People--friends, family members, work colleagues, salespeople--lie to us all the time. Daily, hourly, constantly. None of us is immune, and all of us are victims. According to studies by several different researchers, most of us encounter nearly 200 lies a day. Now there's something we can do about it. Pamela Meyer's Liespotting links three disciplines--facial recognition training, interrogation training, and a comprehensive survey of research in the field--into a specialized body of information developed specifically to help business leaders detect deception and get the information they need to successfully conduct their most important interactions and transactions. Some of the nation's leading business executives have learned to use these methods to root out lies in high stakes situations. Liespotting for the first time brings years of knowledge--previously found only in the intelligence community, police training academies, and universities--into the corporate boardroom, the manager's meeting, the job interview, the legal proceeding, and the deal negotiation. WHAT'S IN THE BOOK? Learn communication secrets previously known only to a handful of scientists, interrogators and intelligence specialists. Liespotting reveals what's hiding in plain sight in every business meeting, job interview and negotiation: - The single most dangerous facial expression to watch out for in business & personal relationships - 10 questions that get people to tell you anything - A simple 5-step method for spotting and stopping the lies told in nearly every high-stakes business negotiation and interview - Dozens of postures and facial expressions that should instantly put you on Red Alert for deception - The telltale phrases and verbal responses that separate truthful stories from deceitful ones - How to create a circle of advisers who will guarantee your success

We are living in an age with unprecedented levels of poverty. Who are the new poor? And what can we do about it? Today 13 million people are living in poverty in the UK. According to a 2017 report, 1 in 5 children live below the poverty line. The new poor, however, are an even larger group than these official figures suggest. They are more often than not in work, living precariously and betrayed by austerity policies that make affordable good quality housing, good health and secure employment increasingly unimaginable. In The New Poverty investigative journalist Stephen Armstrong travels across Britain to tell the stories of those who are most vulnerable. It is the story of an unreported Britain, abandoned by politicians and betrayed by the retreat of the welfare state. As benefit cuts continue and in-work poverty soars, he asks what long-term impact this will have on post-Brexit Britain and on the seventy-fifth anniversary of the 1942 Beveridge report--what we can do to stop the destruction of our welfare state.

What will your 100-year life look like? Does the thought of working for 60 or 70 years fill you with dread? Or can you see the potential for a more stimulating future as a result of having so much extra time? Many of us have been raised on the traditional notion of a three-stage approach to our working lives: education, followed by work and then retirement. But this well-established pathway is already beginning to collapse - life expectancy is rising, final-salary pensions are vanishing, and increasing numbers of people are juggling multiple careers. Whether you are 18, 45 or 60, you will need to do things very differently from previous generations and learn to structure your life in completely new ways. The 100-Year Life is here to help. Drawing on the unique pairing of their experience in psychology and economics, Lynda Gratton and Andrew Scott offer a broad-ranging analysis as well as a raft of solutions, showing how to rethink your finances, your education, your career and your relationships and create a fulfilling 100-year life. · How can you fashion a career and life path that defines you and your values and creates a shifting balance between work and leisure? · What are the most effective ways of boosting your physical and mental health over a longer and more dynamic lifespan? · How can you make the most of your intangible assets - such as family and friends - as you build a productive, longer life? · In a multiple-stage life how can you learn to make the transitions that will be so crucial and experiment with new ways of living, working and learning? Shortlisted for the FT/McKinsey Business Book of the Year Award, The 100-Year Life is a wake-up call that describes what to expect and considers the choices and options that you will face. It is also fundamentally a call to action for individuals, politicians, firms and governments and offers the clearest demonstration that a 100-year life can be a wonderful and inspiring one.
