Originally published in 1993. This study was written in 1946 having been commissioned by a large corporation in the food industry. The insights from this agricultural economics perspective even now are highly interesting. At the time there was real concern over food shortage and the UN and US government assumed there would be a problem for a long time to come. This study showed otherwise and set out suggestions for food policy and foreign aid policy with regards to food. This thorough study is an exemplary snapshot of the history of food policy and has lessons still to share.

""The report is essential reading for policy makers, government workers, and academics pursuing the goal of equitable, sustainable development across the world."" - N. R. Narayana Murthy, Chairman and Chief Mentor Infosys Technologies Ltd. Information and communication technology (ICT) is rapidly

evolving, changing rich and poor societies alike. It has become a powerful tool for participating in the global economy and for offering new opportunities for development efforts. ICT can and should advance economic growth and reduce poverty in developing countries. It has been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world."

Considering the Islamic world from Morocco to Indonesia, Somalia, and Bosnia, Schulze (Islamic studies, U of Berne) charts their histories during the 20th century. Rather than taking each one in turn, he narrates chronologically the political changes throughout the world where Islam is the dominant cultural force. He begins with the impact of colonialism and ends with struggle between Islamic culture and civil society in the 1990s. He includes several maps. An irresistible novel brimming with wit, warmth, and Irish humor, about the married owners of a friendly tavern in Belfast and the intimate lives of the customers and employees who band together to save it from demolition. Jack Beaumont and his beautiful wife, Lily, are the owners of the tavern on Maple Street, a tiny Victorian pub they inherited from Jack's great-uncle Ernest. It's a quiet place, untouched by the modern world, and that's why the customers like it so much. But a property developer wants to demolish the tavern and build a shopping mall on Maple Street. Jack and Lily and their little home-away-from-home are suddenly plunged into the limelight, caught in a desperate struggle to save their business from the bulldozers--or, with the help of some new employees, to at least make as much money as possible during their last few months as landlord and landlady. In The Tavern on Maple Street, Sharon Owens delivers another delicious sparkler full of love, friendship, relationships, and the day-to-day lives of ordinary people, one that

is sure to satisfy readers' insatiable appetite for her romantic and quirky Belfast tales.
